PROJECT NAME

- Private Cloud Implementation

MICROSOFT FOCUS

- Infrastructure

PRODUCTS

- Microsoft System Center Configuration Manager
- Microsoft System Center Operation's Manager
- Microsoft System Center Service Manager

NUMBER OF USERS

- 55,000 Employees

OVERVIEW

Our client delivers comprehensive services to support its customers across the complete life cycle of their assets, from concept to decommissioning, across a range of Oil & Gas, Power, Infrastructure, Government, Mining and Industrial & Manufacturing.

PROBLEM

Customer wanted to utilize the Microsoft tools they already owned in order to be more efficient monitoring and managing assets, as well as adding a cost-effective ticketing system to improve overall operations

SOLUTION

This project was broken out into the three products: SCCM, SCOM, and SCSM. Each technology was broken down into the following stages: Assessment, Design, Implementation, Documentation
